## THE ALTERNATIVE TO AESTHETIC MEDICINE

### The Guinot Story

Founded by chemical engineer René Guinot in 1963, our treatments and skin care products have revolutionised the world of beauty. In 1972, we pioneered the industry with the Hydradermie Machine, the first exclusive facial treatment method. Using a gentle ionisation process, it makes the skin more receptive to active ingredients subsequently applied thus delivering unparalleled, instant and visible results.

Guinot was the first brand to create skin care products containing our Cellular Life Complex, which contains 56 active ingredients. This ingredient complex was also used in hospitals to create new skin, including the treatment of serious burn victims.

Now a truly iconic company, Guinot has conquered the hearts of people all over the world with unique products and treatments containing active ingredients that are constantly on the cutting edge of science and technology. Guinot Research is constantly pushing the limits of effectiveness and performance to improve and find new treatment techniques and methods.

### Guinot Treatments

As a treatment led brand, Guinot leads the way with our award-winning Hydraderm Cellular Energy Machine. By applying a gentle combination of dual ionisation and thermal currents, product ingredients are permeated deeper into the skin for undisputable results.

At Guinot Research and development is paramount because science is the driving force behind our brand. We are continually committed to developing treatment and product formulas. The manufacturing of all products are carried out with the highest standard of pharmaceutical accuracy and diligence, all within our own distribution plant based in France.

The active ingredients that are incorporated in our formulas are sourced from renewable plants and are preserved without parabens. We always test our formulas in our laboratory using human skin cells and never test on animals.
